Finestra della chat aperta Riduzione al minimo della finestra del chatbot Caricamento del chatbot in corso Nuovo messaggio In line with your reports, it is found laptops and desktops like HP often stumble upon Beats audio driver errors, for instance, HP beat audio can't be recognized by Windows 7, 8, 10 and 11 due to the incompatible audio driver. Undoubtedly, considering the strengthened performance of sound offered by Beats audio, more and more people prefer to use it on laptops like HP envy 15, 23, etc. So when they are problems with Beats audio driver for HP laptops like HP envy m4, it is necessary to reinstall or update Beats audio driver for Windows 10/11. Or for some of you, you may wish to reinstall Beats audio driver after a clean installation of Windows 10. Methods: Method 1: Download Beats Audio Driver Automatically No matter you want to fix Beats audio driver issue on Windows 10 for HP laptops or desktops, or in other cases, you would like to update the audio driver for enhanced sound performance, you can take this way to quickly and precisely get Beats driver. Here Driver Booster, the professional and top-one driver detector, finder, and downloader, will be of great help to download the latest Beats audio driver for Windows 11, 10, 8 and 7. 1. Download, install and run Driver Booster. 2. Then hit Scan. Driver Booster will start to scan your laptop or desktop for the missing, corrupted, and even faulty device drivers. 3. Find out Sound, video and game controllers and then hit Update to get the Beats audio driver. 4. Or if there are many outdated drivers, click Update Now to let Driver Booster download all the updated device drivers. In this way, you can play a song or movie to see if your Beats audio device on computers like HP works well. More often than not, your Beats audio driver issues such as not recognized have been solved by Driver Booster if the drivers are updated automatically. Using this software, it can also fix Razer Krazen Mic does not work issue. Method 2: Download Beats audio driver in Device Manager In terms of Beats audio drivers for Windows 10/11, you can also turn to Windows 10 embedded tool - Device Manager to search for the updated driver you need. In some cases, this system manager is able to fix HP Beats audio not detected by Windows 10 simply. 1. Go to Device Manager. 2. Expand Sound, video and game controllers and right click the audio driver to Update driver. 3. Then Search automatically for updated driver software. You can see Device Manager is searching automatically online for the latest Beats audio driver for Windows 10, 8, 7. For some of you, you will notice that Device Manager has successfully installed the audio driver on your HP envy 24, etc. Then there is no more Beats audio issue. Related: Static in Headphones and Speakers on Windows 11/10 Method 3: Download HP Beats Audio Driver Manually Since HP Beats audio driver issue is rather common for users, here this post shows you how to find the Beats audio drivers for HP Envy or Pavilion laptops from HP official site. On this website, you can find other drivers for your HP device so long as you entered your HP model. 1. Navigate to HP official site. 2. On the HP site, find your HP model either by Let HP find my products or by Enter my HP model number, for instance, take HP ENVY 15-as000 Notebook PC as an example. Here if you know the serial number of your HP device, just enter it by yourself. Otherwise, let HP find my products. 3. Then choose your Operating System and then Driver - Audio to Download HP audio driver for Windows 10. At this moment, you can check the Beats device connected on HP envy m6, pavilion dv7, etc. can be working. In a word, it is suggestible for you to try ways above to find and download the Beats audio driver for Windows 10 to fix various audio driver issues or to earn enhanced audio performance. Need for in-home service is determined by HP support representative. Customer may be required to run system self-test programs or correct reported faults by following advice given over phone. On-site services provided only if issue can't be corrected remotely. Service not available holidays and weekends.HP will transfer your name and address information, IP address, products ordered and associated costs and other personal information related to processing your application to Bill Me Later®. Bill Me Later will use that data under its privacy policy.Microsoft Windows 10: Not all features are available in all editions or versions of Windows 10. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows 10 functionality. Windows 10 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. See Rewards qualifying and eligible products/purchases are defined as those from the following categories: Printers, Business PCs (Elite, Pro and Workstation brands), select Business Accessories and select Ink, Toner & Paper. Most desktop computers and laptops come with a built-in Bluetooth adapter. Although Bluetooth is not as useful as Wi-Fi these days, your PC must have Bluetooth to connect all kinds of Bluetooth devices (such as the headset, speaker, and phone) to your PC. If you have turned on the Bluetooth but unable to connect an external Bluetooth device to your PC or unable to pair your phone with your PC, it could be because of a faulty or corrupt Bluetooth driver. While we recommend trying other troubleshooting methods out there before uninstalling or reinstalling the Bluetooth adapter driver, uninstalling and then reinstalling the Bluetooth driver fixes the issue in most cases. Uninstall or reinstall the Bluetooth driver in Windows 10 Complete the directions given below to uninstall or reinstall the Bluetooth driver in Windows 10. NOTE: Before uninstalling or reinstalling the Bluetooth driver, we recommend you try restoring the Bluetooth driver to the previous version check if it addresses the issue. Step 1: Open the Device Manager. To do that, right-click on the Start button on the taskbar and then click on the Device Manager option. Step 2: In the Device Manager, expand the Bluetooth category tree to see the Bluetooth adapter's entry. Step 3: Right-click on the Bluetooth adapter's entry and then click the Uninstall device option. This will open Uninstall device dialog. Step 4: Check the Delete the driver software for this device option and then click on the Uninstall button. Step 5: The Bluetooth driver will now be uninstalled from your device. We recommend you reboot your PC once after uninstalling the driver. Step 6: To reinstall the Bluetooth driver, simply navigate to Windows 10 Settings app > Update & Security > Windows Update page and then click the Check for updates button. Windows 10 will automatically download and install the Bluetooth driver. If it does not automatically install the required Bluetooth driver, please manually download it from your PC manufacturer's website and run the setup file to install it.
